THE REPORT
OF THE
NORTH CAROLINA PENITENTIARY,
For the Years 1895 and 1896.

REPORT OF DIRECTORS.

RALEIGH, N. C., January 1, 1897.

*To His Excellency ELIAS CARR,
Governor of North Carolina.*

In behalf of the Board of Directors, I have the honor to submit the reports of the State's Prison for the years 1895 and 1896, showing the operations conducted, all necessary information as to the prison population, and the condition of the institution, as set forth by the elaborate report of the General Manager hereto appended.

The Board have from time to time, as the law requires, visited the farms and camps, have found everywhere good discipline, the prisoners well cared for and humanely treated in every particular. The Board have examined the vouchers on file in the Treasurer's office, and take pride in saying that we not only find that expenditures have been properly made, but especially that these expenditures have been met entirely by the earnings of the Penitentiary for the year 1896, and there remain on hand valuable assets upon which to continue the operations.

I am, very respectfully,

Your obedient servant,

A. B. YOUNG,
President of Board of Directors.

REPORT OF THE GENERAL MANAGER OF THE
STATE'S PRISON FOR THE YEARS
1895 AND 1896.

OFFICE OF GENERAL MANAGER,
RALEIGH, N. C., January 1, 1897.

To the Honorable

*The Board of Directors of the North
Carolina Penitentiary.*

The Act of the General Assembly of 1895, Chapter 417, repealed all those Sections of Chapter 283 of the Acts of the General Assembly of 1893, requiring any report of the business of the Penitentiary. Upon your organization under the Act of 1895, you adopted a rule requiring full and complete reports annually. The report for 1895 was prepared and submitted at the end of that year. I have the honor to submit now the report for 1896. Both will be published in one volume.

FARM OPERATIONS.

The operations of the year 1895 were, as before, mainly farming, upon three farms on the Roanoke and one in New Hanover county, together with work continued through the year at Roanoke Rapids, and for a short period for the Rocky Mount Mills.

The year was unusually free from disaster, the crops were fairly good, the health of the convict population a continued improvement upon former years, and the general results satisfactory.

The operations in farming covered an area of say 10,600 acres in all crops and upon these were employed generally about 850 convicts out of an average total of 1,237.

The short crop, and more especially the low prices of products of the year 1894, had not left us fully provided

for another year, and therefore we needed the appropriation of \$30,000 made by the General Assembly of 1895, and used the same to defray about one-seventh of the expenses of the Penitentiary for that year; the remainder was paid from our earnings.

The principal crops maturing in the fall of 1895, being an increase in quantity over those of 1894, and cotton at 8 cents, reinforced the finances of the Penitentiary helpfully and enabled us to begin the present year with a comfortable surplus to operate upon. The farming this year has been extended by some increase of the acreage cultivated upon the Caledonia, Northampton and Halifax farms on the Roanoke, and by the lease and opening of a new farm near Wadesboro in Anson county. The area of this new farm is near 2,300 acres, of which only about 600 were in a state of cultivation. The area of Anson Farm added to the others on the Roanoke makes an aggregate of 14,600 acres now under control of the Penitentiary by lease. The area cultivated in all crops this year is estimated to be 11,300 acres.

Upon these broad fields there was, the middle of July, a magnificent crop, superior to any theretofore produced on them. The heavy rains of that period brought the greatest flood for many years upon the Roanoke Valley. Our dikes were believed to be sufficient to withstand a 40-foot flood, and they were. The July flood was 42 feet and over at Weldon, and invaded all the farms on the river. The dike on Caledonia Farm, protecting 3,000 acres of corn and cotton, otherwise exposed to the river, was broken through at a point which had stood impregnable for more than half a century. The dike on Northampton Farm had been built since its occupation by the State in 1890; it was broken at two points. The other farm, Halifax, is practically without dikes, and it is not believed, from the topography of the land and river, that it

can be done successfully. This flood covered 3,500 acres of corn and 1,000 acres of cotton, besides other crops, destroying not less than 100,000 bushels of corn and 425 bales of cotton. It left about 15 per cent. of the corn crop, this remnant being entirely upon the highlands. But the most of the cotton being upon the higher lands escaped the devastation, and has produced by far the largest crop raised so far, notwithstanding the loss. The crop this year amounts to 2,659 bales of 450 pounds, which is 600 bales more than last year or the year before. The corn saved will be sufficient for support till spring. There will be forage for sale. With the new lands opened on Anson Farm there should be 12,000 acres in cultivation in 1897, which should make a support for the Penitentiary.

As a manifest of the development of the farms I respectfully refer to Principal Crop Table inserted here :

TABLE OF PRINCIPAL CROPS.

FARMS	Cotton, 450 lb. Bales.						Corn, bushels.			
	1891	1892	1893	1894	1895	1896	1893	1894	1895	1896
Halifax.....	100	100	199	337	300	348	7390	3500	12977	3750
Northampton.....	192	260	426	463	420	546	13730	28400	22640	8400
Caledonia.....		300	562	1173	1278	1553	33400	56272	63344	5000

Halifax Farm lost largely by flood every year; Northampton Farm lost, not so heavily, two years out of four; Caledonia Farm suffered no loss till the year 1896, when, like the others, it lost nearly all.

SANITARY CONDITION.

I beg leave to call especial attention to the reports for 1895 and 1896, hereto appended, by Dr. James W. McGee, Physician in Chief, exhibiting gratifying improvement in the sanitary condition of our population, and very justly commending the work of the physicians in charge of the

different camps. It is especially worthy of notice in this connection that the death rate has greatly decreased on the Roanoke farms. Caledonia Farm, commonly considered most unhealthy, had 29 deaths from disease in 1894, 18 in 1895, and 14 in 1896. The total number of deaths for the whole Penitentiary for 1895 and 1896 are, respectively 40 and 39, while for several years preceding the total had been between 50 and 60. The present rate of mortality barely exceeds that of some of the best-regulated towns of the State; as to the colored people, even much less than their rate of mortality in several large towns. With continued diligence and care, the sanitary condition may be further improved, it is reasonable to expect.

THE NUMBER OF CONVICTS. X

From exactly what cause I am unable to say, but it is gratifying to report that the average number of convicts in the Penitentiary this year is only 1,198, as compared with 1,237 in 1895 and 1,234 in 1894; and the number in prison now is 1,145, as compared with 1,246 in 1895 and 1,265 in 1894. There are far more short-term convicts since the Act of 1895 making one year the maximum penalty for larceny of goods of less than twenty dollars in value; and so many were committed last year under this limit, whose terms are rapidly expiring, as in part to account for the present small number. The increased employment of convicts by the counties upon their own roads and farms, at their own expense, works a sensible relief to the State's Prison. It is to be hoped, that other counties will follow the example well set by Mecklenburg, Buncombe and others, except in that they generally send their feeble and disabled men and their women to this prison, where their earning is *nil*, and the Penitentiary can support them with difficulty. There are prisoners here, many of them totally disabled when they came, and who remain so. We

support probably 100 of this class of prison paupers all the time. Another fact affecting the number of convicts is the frequency of their returns. One prisoner is here the seventh time, and is yet under 22 years old. Many come the second time, not a few the third. When a man continues to commit crime, without the fear of the penalty, repeatedly returns to prison and becomes a penitentiary habitué, it argues his incorrigibility and his perpetual menace to society. In some States the third termers is imprisoned for life.

JUVENILES IN PRISON.

It may be held that the design of a penitentiary is primarily to protect society from criminals; secondarily, to punish for the purpose of determent, and to reform for the purpose of securing good citizenship. The criminal is not the unfortunate, ordinarily. Society suffers the misfortune in the wrongs against person and property and order, and is first entitled to protection. While the man who commits a crime must be deprived of his liberty, it is wise and just also that the punishment should be so directed as if possible to lead to his reformation. And yet we are compelled with regret to confess that with the criminal class of mature years there is little hope of success. The chances of success with those amount to a small percentum. With the younger class the chances are better, but there can be little hope of reformation where they are in constant contact with older and hardened men, acquainted with every form and device of criminality. If the boys and girls can be entirely isolated, and given mental and moral as well as industrial training, altogether separate and apart from the Penitentiary, some of them may be reared to be fairly good men and women; and if this much is true, certainly the effort might be made. A juvenile reformatory will be a charge upon the State doubtless to

some extent; so are all charitable institutions. If established, it should be separate and distinct from the Penitentiary. There are thirty youths in this Penitentiary under the age of sixteen years. One of them entered at nine years, was discharged at fourteen, and returned within five months.

RELIGIOUS PRIVILEGES OF THE PENITENTIARY.

It is matter of sincere regret that these are not more satisfactory. Regular preaching by accredited ministers of the different denominations has been provided for two Sundays in each month at one of the five farms, once a month at two of the farms, irregularly at the remaining two. Regular preaching service is had four Sundays in each month at the central prison by several pastors of the Raleigh churches. These services have been paid for by the Penitentiary. Besides the preaching services, a Sabbath school is well and faithfully conducted every Sunday at the central prison by a number of devoted Christian gentlemen from the city, sometimes assisted by ladies. But the whole service falls much short of the necessity. There ought to be, in the scattered condition of our population, three or four pastors or chaplains, whose daily contact with the prisoners and ministrations to the sick and dying should be of great value.

THE QUESTION OF SELF-SUPPORT.

The Constitution, Article XI., Section 11, says: "It shall be steadily kept in view by the Legislature and the Board of Public Charities that all penal and charitable institutions should be made as nearly self-supporting as is consistent with the purposes of their creation." Herein is fixed in the organic law the policy of the Penitentiary. It must be self-supporting, or as nearly so as possible. Can this cumbrous and necessarily expensive institution be made entirely self-supporting?

From 1883 to 1889 the appropriations from the taxes collected in the State Treasury for the support of the Penitentiary averaged over \$100,000 a year.

From 1889 to 1893 they averaged \$37,500 a year, a change of policy in accordance with the injunction of the Constitution being made in 1889.

From 1893 to 1895 the appropriation averaged \$23,000 a year.

And for the year 1896, just closed, the Penitentiary has paid all its expenses, having placed in the State Treasury a dollar of its own earning for every dollar drawn or paid out on its account. We drew \$5,000 from the appropriation of \$30,000 made by the General Assembly during the summer; but we leave more than \$5,000 there in cash on December 31, 1896. The appropriation for 1896 remains in the Treasury.

It may be deemed occasion for some self-gratulation that the Penitentiary for the first time in its history of more than a quarter of a century has been able to report absolutely and clearly its full support from its own resources. What has been accomplished may be done again, not probably every year, but certainly, if the present policy is maintained, self-support should be attained or approximated closely every year.

I would call attention to Exhibits and Statements incorporated in this report, showing the exact financial results of the different divisions of the Penitentiary for the years 1895 and 1896 separately.

Exhibit A is a general balance sheet covering all operations for the year. For 1895 this shows a balance of \$69,225.08. For 1896 it shows a balance of \$91,694.40.

Your efficient Secretary submits statements conveying necessary information in regard to the number, term of sentence, location, &c., of the prison population.

A report by the Deputy Warden, who is and has been the competent purchasing agent of the institution, conveys information as to the total expenditures in items and other important matters.

I also invite examination of the report of the Warden, who has control of the central prison and its operations, and whose management is entitled to high commendation.

You will permit me to thank you, gentlemen of the Board, for your wise and practical counsel and direction in the executive management of this complicated business. We have had grave difficulties to overcome, sometimes apparently insurmountable. Our success results from a cordial co-operation and untiring effort.

I desire through you to convey to Governor Carr some expression of gratitude, though inadequate, for his constant interest and always helpful and respected advice concerning the conduct of this department of the State's work. He always bore a good part of our burden and inspired a wise courage to conquer our difficulties. The credit of success belongs to Governor Carr and his administration.

I wish to express sincere appreciation of the kindly service of the Treasurer and his subordinates, especially of the paymaster, Major Martin, who has been uniformly prompt and very accommodating.

It would be positively unjust if I failed to record my testimony to the faithfulness, efficiency and loyalty of my subordinates, here at the central prison, and out on the lines where most has been accomplished. I do not know a better corps of officers and employes in any business, public or private, corporate or individual, in the State.

Respectfully submitted,

A. LEAZAR.

REPORTS FOR 1895.

WARDEN'S REPORT, 1895.

RALEIGH, N. C., January 1, 1897.

HON. A. LEAZAR, *General Manager*.

As Warden of the State's Prison I beg to submit the following report for the year ending December 31, 1895:

There have been no serious outbreaks against authority, and the discipline has been fully maintained.

We still have quite a number of young prisoners who might be advantageously separated from the older criminals.

In the machine shop our operations have been confined almost entirely to repairing; the piping is getting old and requires almost continual repairs. We have made five one-horse wagons and a lot of brick wheelbarrows.

We have all the laundering we can do for private families of the city.

We made and burned about 1,900,000 brick, and in addition have burned three kilns left over from last year. We have now on hand, ready for market, 1,205,000 hard brick and 65,000 salmon, less than six per cent. of all we burn being salmon.

We have manufactured 4,640 pairs of shoes for prisoners, besides doing the general repairing.

We find our garden, containing about ten acres, and worked by such convicts as are about useless for any other labor, yields enough vegetables for several months' supply, and is very valuable to the prison.

Respectfully submitted,

JOHN M. FLEMING,

Warden.

PHYSICIAN'S REPORT, 1895

PENITENTIARY.

HON. A. LEAZAR, *General Manager of State's Prison.*

I have the honor to submit my report of the Medical Department of the Penitentiary, and farms under its management, for the year 1895.

There were 494 prisoners examined when admitted into prison, and of this number 64 were classed unsound, and the health of some was such as to make it necessary to place them in the hospital for treatment.

There were, during the year, the following surgical operations, viz.: Aspiration of chest, 4; incised wound, 1; urethral stricture, 3.

The appended tables will exhibit the class and number of cases of sickness treated and the result.

You will observe that there were no fatal cases of acute disease treated, and that all the deaths were from chronic incurable troubles.

There were 8 prisoners returned from farms for treatment.

I am glad to be able to state that the number of deaths in the Penitentiary proper during the year shows a decrease of one-half the number in 1894, and less than has occurred in any year since the establishment of the Penitentiary in 1870.

The total number of deaths from disease for all quarters also shows a decrease over the previous years, namely, from 52 deaths in 1894 to 40 deaths in 1895, a decrease of 23 per cent.

There are now in the hospital a number of incurable cases and one insane man.

HALIFAX FARM.

At Halifax Farm the sanitary conditions have shown such improvement that we may confidently hope to see malarial diseases almost abolished at all quarters on the river. The force at this place consists of both male and female prisoners, many of them debilitated by disease.

I append a table exhibiting the class of disease and number treated, showing improvement over the year previous; also, a table of deaths as reported to me by Dr. West.

DISEASES.

<i>Class of Diseases.</i>	<i>No. Cases.</i>	<i>Class of Diseases.</i>	<i>No. Cases.</i>

CASTLE HAYNE.

Dr. I. C. M. Loftin, having medical control at this place, concisely states in his last report for December :

“In the year just passed, while the number of cases of sickness has been large, it has been generally mild, having but very few cases of a serious nature, and no deaths to report from any cause. We begin the new year with a clean bill of health, the force at this place being in fine condition, both as to health and morale.”

The appended table exhibits the class and number of cases treated :

REPORTS FOR 1896.

WARDEN'S REPORT, 1896.

RALEIGH, N. C., January 1, 1897.

HON. A. LEAZAR, *General Manager of the North Carolina Penitentiary.*

As Warden of the State's prison I beg to submit the following report for the year ending December 31, 1896 :

While the discipline of the prison has been fully maintained and subordination and good conduct secured, it gives me pleasure to state that punishment has been less frequent than in some years.

It is not to be forgotten that the Penitentiary is a place of punishment for those convicted of infamous crimes, and it is the duty of the Warden to see that the sentences are faithfully executed and good order fully maintained.

The management of the Penitentiary under the present officers has been strict but kind, the officers being instructed to give the prisoner all doubts, and not to report any prisoner unless he is sure that he had willfully broken some rule or is guilty of some misdemeanor, it being explained to the prisoners that they must learn to submit to authority, and that discipline must be maintained at any cost.

There is no question but that a well-regulated commutation law is a great incentive to the convict to behave well. Our law does not go far enough. I would recommend that the commutation for good behavior be considerably increased to, at least, ten days per month after five years.

The cells for sleeping have been kept as clean as possible. Clean sheets and towels are put in every week, and

each prisoner is responsible that his cell is kept in good order.

We still have quite a number of young prisoners who might very advantageously be separated from the older and more hardened. The operations of the machine shop have been almost entirely confined to repairing. We have manufactured, however, twelve two-horse and one one-horse wagon. We manufacture also our own wheelbarrows both for brick and clay.

The piping is getting old and requires almost continual attention.

We are doing all the laundering we can with our present facilities. If we had ironing machinery our capacity would be more than doubled, and we could secure all the work we are capable of doing.

We have made and burned eleven and one-half kilns of brick of 225,000 each, and have now on hand 729,047 hard and 318,400 salmon.

We have manufactured 6,222 pairs of shoes, in addition to doing the general repair work of the prison.

We find our garden, containing about ten acres and worked by such convicts as are about useless for any other labor, yields enough vegetables for several months' supply, and is very valuable to the prison.

I desire to return my sincere thanks for the uniform courtesy and kindness I have always received at your hands.

Respectfully submitted,

JOHN M. FLEMING,

Warden.

PHYSICIAN'S REPORT, 1896.

HON. A. LEAZAR, *General Manager of the North Carolina Penitentiary.*

I herewith submit my report of the Medical Department of the North Carolina Penitentiary, and the farms under its control, for the year 1896 :

The report will show a great improvement in the sanitary condition of the prison and farms. There were received into the Penitentiary during the year 1896 471 prisoners. Of this number 58 were unsound, and 32 were placed in the hospital for treatment. During the year there were treated in the main hospital 293 cases, and 11 surgical operations were performed.

Last spring the prison was visited with an epidemic of mumps, which, added to slight fevers, constipation and malaria, made up a large proportion of the complaints. On the 10th of September there was returned from the Ashboro Railroad a squad of prisoners in a disabled condition. Sixteen of these men were placed in the hospital for treatment; six were cases of typhoid fever. Two of the typhoid fever cases were complicated and severe.

All these men have been restored to their usual health, and returned to light duty about the prison buildings. At this time there are only a few cases in the hospital, and these are chronic and incurable. You will perceive that the death rate is materially reduced from last year.

NORTHAMPTON FARM.

The table of cases treated at the Northampton Farm clearly indicates a continued improvement in the health of the prisoners at this point.

Both the Halifax and Northampton Farms are under the medical supervision of Dr. G. H. West, by whose fidelity and skill much has been done to improve the health of the same.

EXHIBIT No. 4.

CALEDONIA FARM.

The report of Dr. Furgerson, the physician in charge of the Caledonia farms, shows that the health of the prisoners has been carefully looked after. The accompanying table of cases treated indicate the valuable results secured. The number of cases treated has been reduced and the mortality greatly diminished.

<i>Class of Diseases.</i>	<i>No. of Cases.</i>	<i>Class of Diseases.</i>	<i>No. of Cases.</i>

EXHIBIT NO. 5.

CASTLE HAYNE FARM AND MINE.

At Castle Hayne the cases treated, a list of which is herewith annexed, shows that heat and malarial troubles have predominated at this place.

Dr. Loftin attributes most of the sickness to heat and malarial troubles. His annexed table shows the number of cases treated.

<i>Class of Diseases.</i>	<i>No. Cases.</i>	<i>Class of Diseases.</i>	<i>No. Cases.</i>
Heat and malaria.....	240	Surgical.....	10

John Furgerson.....	Continued fever.
F. Branan.....	Pulmonary tuberculosis.

EXHIBIT No. 6.

ASHBORO RAILROAD.

Last spring a squad of prisoners was sent to the Ashboro Railroad. The sanitary conditions were not good, and as a consequence the health of the prisoners suffered. In September the work at this place was discontinued, and the prisoners here employed transferred to Anson Farm, except the sick and infirm, who were returned to the Penitentiary at Raleigh. The table appended will show the cases treated.

<i>Class of Diseases.</i>	<i>No. of Cases.</i>	<i>Class of Diseases.</i>	<i>No. of Cases.</i>
Diarrhœa	28	General ophthalmia.....	1
Dysentery.....	25	Serofula.....	3

DEATHS.

Zeke Johnson.....Typhoid fever.

ROANOKE RAPIDS.

In the month of February the work at Roanoke Rapids was discontinued, and twenty of the prisoners here employed were transferred to Northampton Farm, and the remaining nineteen were sent to the Halifax Farm.

<i>Class of Diseases.</i>	<i>No. of Cases.</i>	<i>Class of Diseases.</i>	<i>No. of Cases.</i>
Bronchitis	4	Malarial fever.....	1
Pneumonia.....	1	La Grippe.....	2
Pleurisy.....	1	Cut hand.....	1
Sprained ankle.....	1		

EXHIBIT No. 7.

ANSON FARM.

This farm was started last spring; the buildings were new, the surroundings and sanitary arrangements unfavorable. It will be seen from the annexed tabulated statement that there was a great amount of sickness and a large mortality. Within the last two months the reports from this farm indicate an improvement in the health of the prisoners.

DISEASES.

<i>Class of Diseases.</i>	<i>No. of Cases.</i>	<i>Class of Diseases.</i>	<i>No. of Cases.</i>
Diarrhoea	78	Dysentery	48
Measles	10	Malarial fever	97
Pneumonia	11	Injuries	41
Parotitis	22	Phthisis	1
Bronchitis	14	Scrofula	3
Catarrhal fever	13	Hernia	2
Syphilis	12		

DEATHS.

<i>Name.</i>	<i>Cause of Death.</i>
Joshua Ball	Pneumonia.
Joseph Burkhart	Pneumonia.
John Bryant	Pneumonia.
James Fredericks	Pneumonia.
Gay Booker	Bronchitis.
George Green	Phthisis.
Frank Geochey	Pneumonia.
John Hooks	Pulmonary phthisis.
Matt Spivey	Sunstroke.
John Lewis	Phthisis.
Calvin Hodges	Pneumonia.

The reports from all the farms show a gradual and continued improvement in the health and comfort of the prisoners.

These results are equally due to the vigilant supervision of the physicians in charge of the farms, and to the

hearty co-operation of the authorities in carrying into effect the sanitary improvements deemed necessary.

The hospital force has at all times rendered faithful and intelligent service to the sick. Allow me, sir, to thank you for your uniform courtesy and kindness to me in the discharge of my official duties.

With much respect,

Your obedient servant,

JAS. W. MCGEE,

Physician.
